A sample of diamonds recovered from the Kahuna Project

Kahuna Project

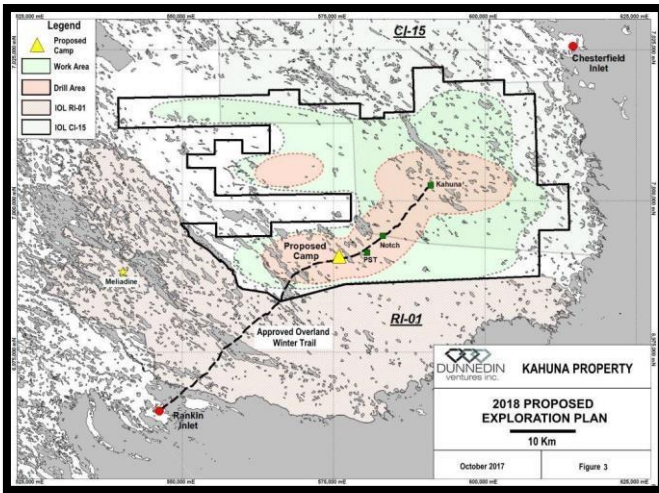

Dunnedin Ventures Inc. has been exploring the Kahuna Project, in the Kivalliq Region of Nunavut since 2015. With its focus on diamond exploration, this April the company is drilling diamond targets selected with Dr. Chuck Fipke, the discoverer of Canada's first diamond mine in the Northwest Territories.

In January 2018, Dunnedin Ventures, formed a new company, Solstice Gold, primarily for the purpose of exploring for gold on its property. In March 2018 Solstice Gold President Marty Tunney and Dunnedin Ventures CEO, Chris Taylor travelled to Rankin Inlet to explain the role of both companies working on the Kahuna Project. Unfortunately, poor weather caused the trip to Chesterfield Inlet to be postponed.

Dunnedin Ventures will continue to focus on diamond exploration and Solstice Gold will focus on gold. In this manner, the Kahuna Project can maximize exploration efforts by sharing staff and services on the project.

Both companies will continue to ensure that local companies and people will be contracted for the success of the project and the communities of Rankin Inlet and Chesterfield Inlet.

In September 2017, the Aqigiq Hunters and Trappers Organization (HTO) assisted the company in identifying a temporary camp location for the 2018 exploration program. It is proposed to take interested members of both the Kangiqliiniq and Aqigiq HTO on a site visit to camp that is currently being built in the summer of 2018.

The 2018 spring exploration program for the Kahuna Project is taking place during April and early May 2018. The first phase of operations includes ground geophysical surveying (Rotary Air Blast), RAB drilling and construction of the Kahuna temporary camp identified on the map above.

A snowmobile supported ground geophysical survey was expected to begin in late March. Drilling operations will likely commence at the end of March or early April and is expected to run approximately 6-8 weeks. Mobilization of camp materials is also scheduled to begin in late March.

Operations will be based out of Rankin Inlet and then once operational, will relocate to the temporary field camp to reduce the helicopter flights from town. Custom Helicopters has been contracted for helicopter support. A red and white helicopter with the call sign C-FCHO will be utilized.

News & Activities

- March 2018: Started mobilization of gear and camp construction
- April 2018: Participated in several local search and rescues
- April 2018: Sponsored music festival in Chesterfield Inlet
- April 2018: Began spring exploration program
